OVER 40 YEARS OF CALF MANAGEMENT EXPERTISE

Partnering with calf professionals to design the most innovative calf housing options

Over the past 40 years, we've learned to listen, because of you, the most progressive farmer who puts the calf first. Innovation follows as we've prioritized the welfare of the calf – producing industry leading product. We continue to grow and expand our product offering as we listen to your needs. We look forward to continuing to produce the best calf housing for you, from you, the calf professional.

THIS IS WHAT MAKES IT A CALF-TEL®

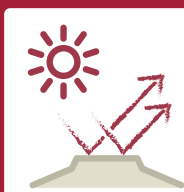

THERMOFORMING ADVANTAGE

Using our innovative thermoforming technology, we've continually evolved and increased our products' durability, UV resilience, ventilation and hygiene. We thermoform Calf-Tel hutches out of extruded sheets of polyethylene. This process results in a molecular bonding within the plastic that is far superior to any other form of manufacturing – providing unmatched strength and durability. With this, we've helped farmers like you raise healthier calves – and make more money!

We Go with the Flow

Ventilation is critical in limiting respiratory illness and eliminating heat stress. The flow of air is strategically engineered into Calf-Tel® hutches, our Medium and Large Hutches are designed with an extra-large ventilation opening (largest in the industry) for maximum comfort and breathability. Our indoor pen systems feature the AirMax panel for improved air-flow in challenging conditions.

Climate-Controlled Comfort

The opaque material of our hutches help keep your calves cooler in the summer and dry on those cold winter days. The plastic contains a layer of titanium dioxide to protect UV rays from breaking down the product over time.

We Promote Biosecurity

Calf-Tel's smooth surfaces don't have any pores, making them not only impervious to said undesirables, but super-easy to clean and maintain. When combined with proper management practices, calf raisers have found that our housing systems contribute to lower mortality, morbidity and overall treatment costs leading to enhanced calf growth.

Money Talks

For over 40 years, Calf-Tel® has been developing products that are built to stand the test of time. Longer lasting product leads to lower lifetime costs. Combine this with the cost savings and benefits of superior calf health and you can see why approximately 2 million calves are raised in Calf-Tel® housing systems worldwide each year.

HEART. MEETS. SMART.

Calf Care Backed by Cutting-Edge Solutions

Our customers care deeply for the health and welfare of their animals, and they boldly invest in new technologies, seek better methods, and embrace innovation that drives their farms forward. Calf-Tel stands beside them with advanced, reliable housing solutions that match their dedication and fuel their progress.

Together, we set a new standard for what's possible.

CALF-TEL® OUTDOOR HUTCHES

BETTER CALF RAISING OUTDOORS

Whatever your needs, we have a calf hutch for you. Our outdoor calf hutches protect your calves from the elements while maintaining integrity and durability for many years. From small to large, our calf hutches are designed with industry-leading features and can be customized to keep your calves healthy and comfortable.

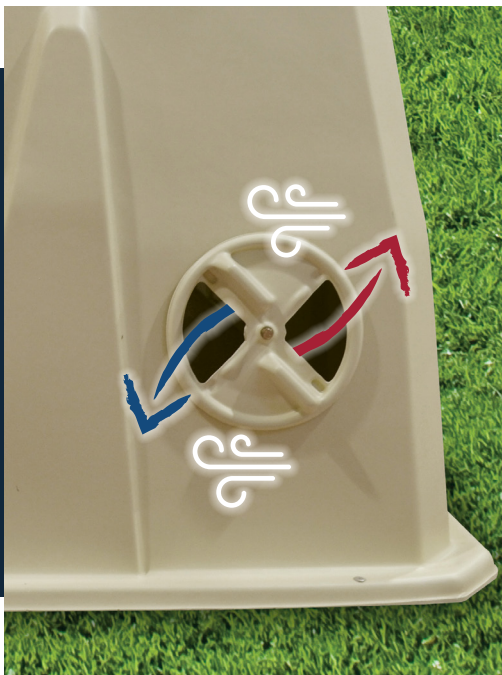

REAR BEDDING DOOR XXL-Sized bedding door on the back. Maximum ventilation – comfortable access.

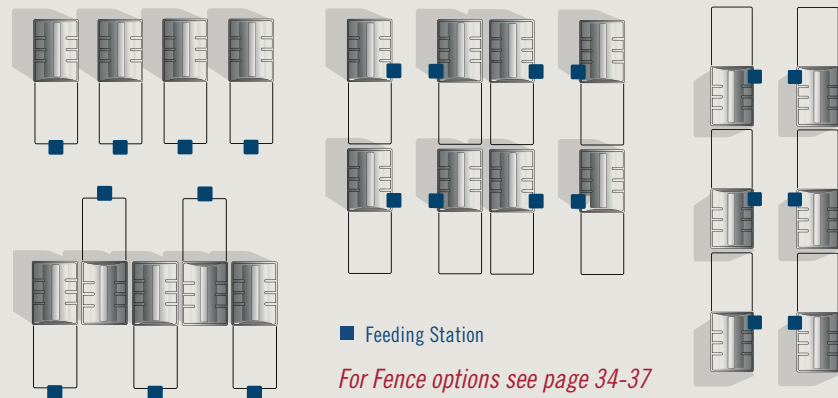

MEGA VENT DOOR Available on Medium and Large Calf-Tel hutches only. Largest vent opening on the market.

Weight and dimensions may vary slightly. Reserve technical changes.

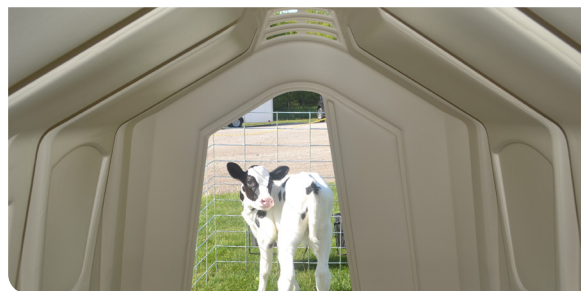

SITE LAYOUT EXAMPLES

Our extrusion plastic base with structured flexibility, virtually impervious to destruction.

Optional feeding doors on right or left side with inside feeding station.

“We have used Calf-Tel hutches for over 8 years with great success. We have over 330 hutches and think they are a great way to raise calves. I am a big believer in Calf-Tel.”

JIM VAN PATTTER

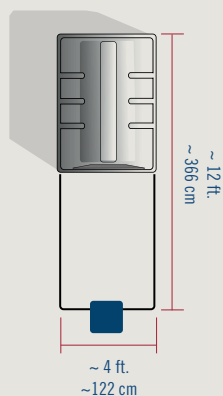

Consider spacing needs between hutches. Keep at least 10 feet / 300 cm between each row and 1 foot / 30 cm between each hutch to prevent calves from touching and reduce the spread of disease. Make sure to allow enough space to access hutches with feeding and bedding equipment to maximize labor efficiency.

GROUP HOUSING

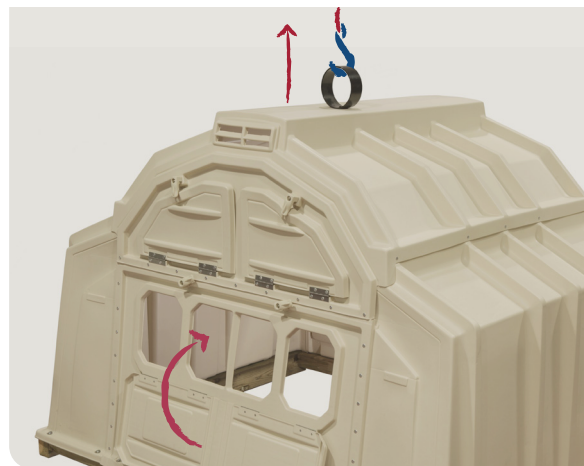

GROUP CALF HUTCH

When calves raised individually are placed in large groups, the stress from competition and social pressure can lead to setbacks in growth and health. The **Group Calf Hutch** provides just the right environment for this important transition and stage of development.

INTERIOR SIZE IN M ²	5.4
IMPERIAL DIMENSIONS	9' x 8'
OUTSIDE L x W x H	220 x 273 x 183 cm 86.5" x 107.5" x 72"
INSIDE USABLE CALF SPACE L x W x H	208 x 259 x 180 cm 82" x 102" x 71"
WEIGHT	107 kg 235 lbs

— Outer dimensions

Optional lifting bracket, designed to fit a front loader blade, evenly distributes weight making moving the hutch effortless.

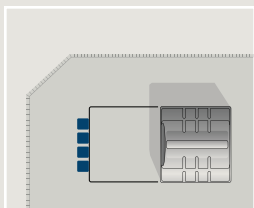

“Our family has always trusted Calf-Tel to raise our calves. They are durable, easy to clean and there is a hutch to fit anyone’s operation. I wouldn’t want to raise our calves in any other hutch!”

DARCY STEFFES

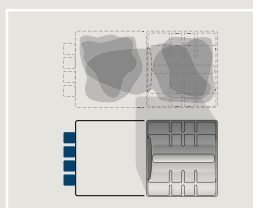

COMMON WAYS THE GROUP CALF HUTCH IS

Prepared Site: Place the **Group Calf Hutch** on a well-drained surface (gravel, crushed stone or sand).

This will keep calves dry and

Rotating Site: Place one **Group Calf Hutch** in a small pasture and move the unit and its pen periodically.

*For Fence options
see page 38*

Large Common Pasture: Place multiple **Group Calf Hutch** in a large pasture with bigger groups. Position the units near each other, as the herd will not separate to housing in different locations.

DUPLEX GATE SYSTEM

Looking to transition your calves from the start? Our NEW Duplex gate allows you to pair raise calves using the Group Calf Hutch and remove the middle pairing gate when ready.

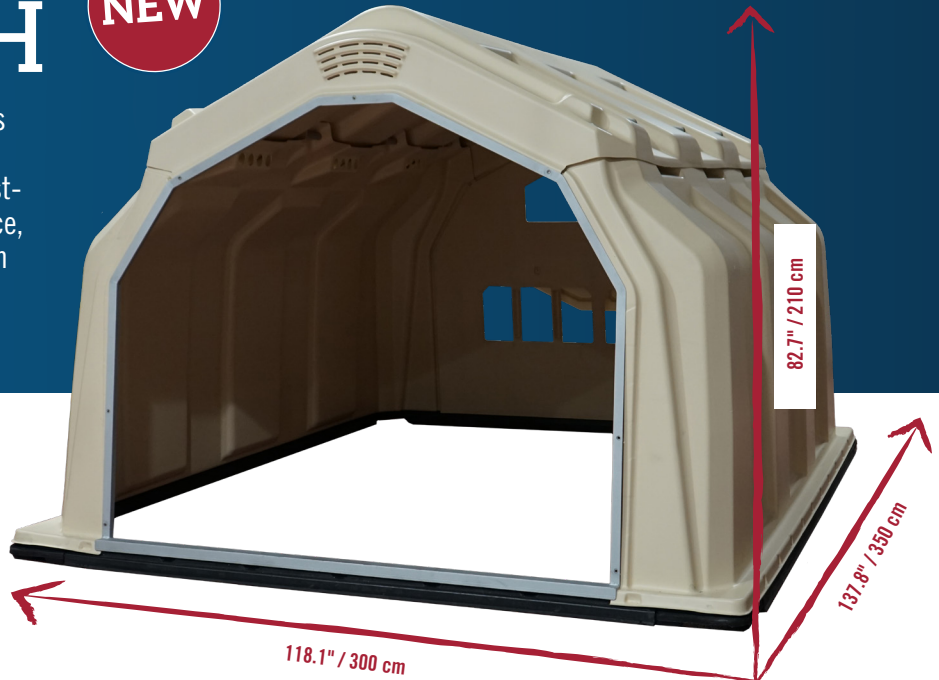

GROUP HOUSING

INDUSTRY-BEST
OPACITY

MAMMOTH

NEW

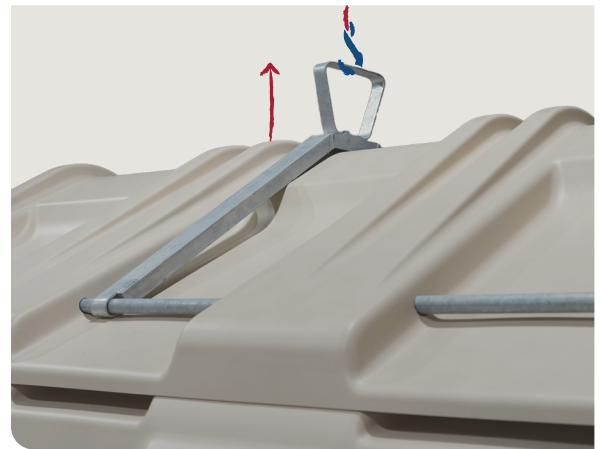

At Calf-Tel, we believe the future of dairy starts with strong calves. That's why we created the Mammoth—designed for group housing or post-weaned transitions, it offers 110 sq. ft. of space, superior airflow, and unmatched durability with high molecular weight polyethylene.

Outer dimensions

GROUP HOUSING

Mammoth Space

An impressive 110 square ft in total footprint.

- 6.9 ft tall
- 9.8 ft in width
- 11.5 ft in length

Mammoth Construction

- Built from high molecular weight polyethylene giving it the durability and strength of other Calf-Tel products you know.
- Built to last the Mammoth is nearly indestructible

Rear and side openings provide ventilation for continuous airflow

MAMMOTH SPACE. MAMMOTH FLEXIBILITY. MAMMOTH RESULTS.

- 4 main structural components for easy assembly
- Minimal hardware required
- Streamlined ventilation ports provide additional airflow
- Additional ventilation on rear bottom doors

When closed—the bottom door is system-integrated with additional ventilation when weather is foul or temperatures drop

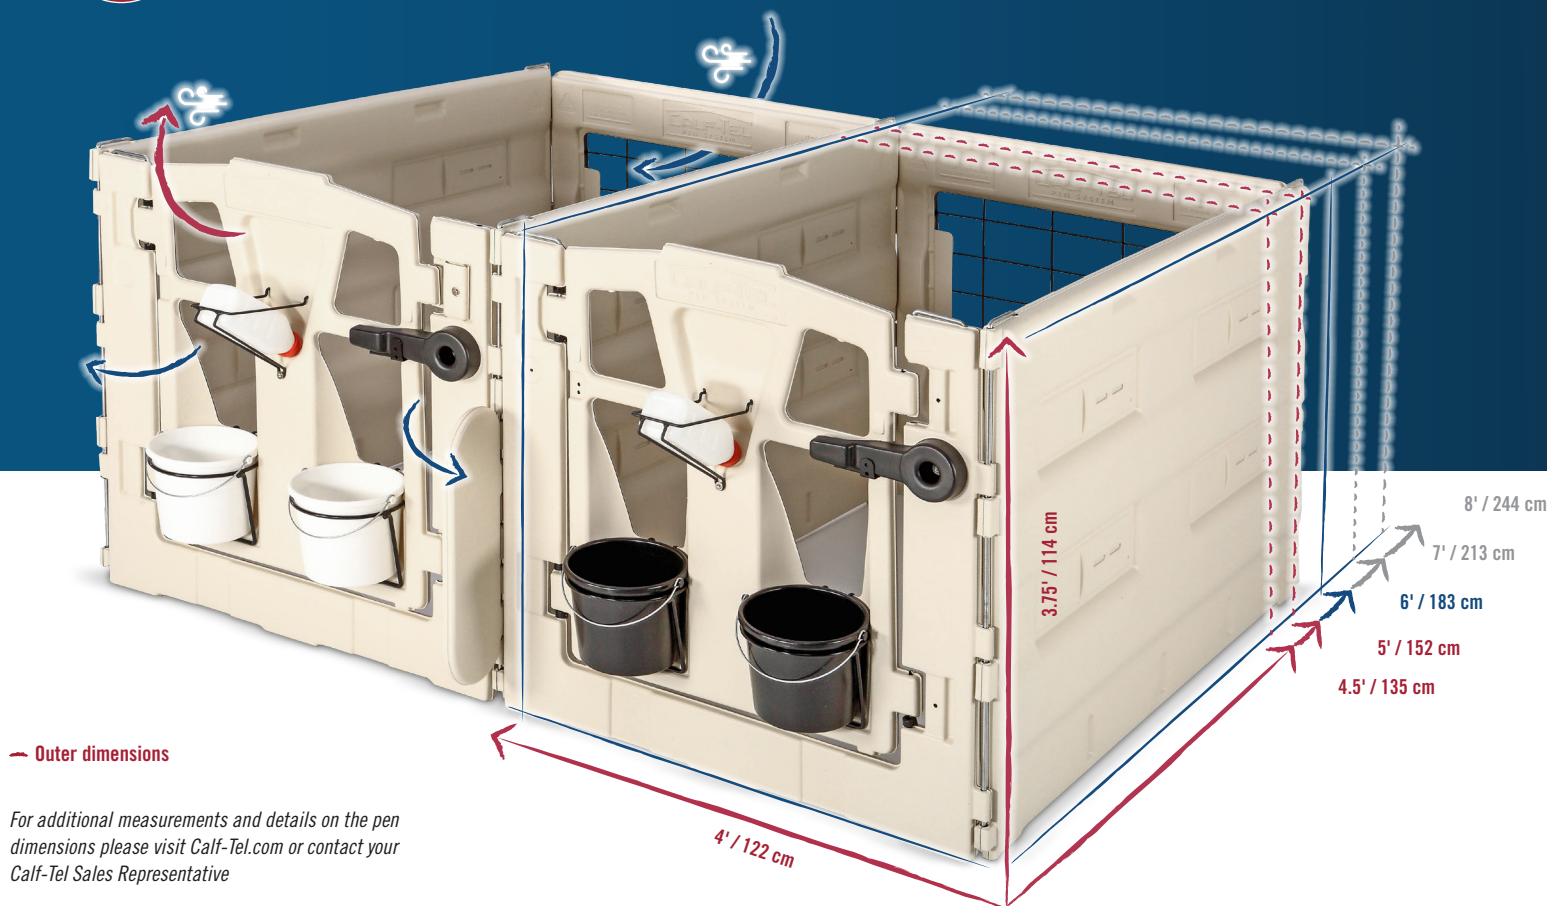

Improved base with beveled edge for easy transportation - No wood!

Rear openings provide multiple options for bedding techniques and automated bedding equipment

INDOOR CALF HOUSING

BETTER CALF RAISING INDOORS

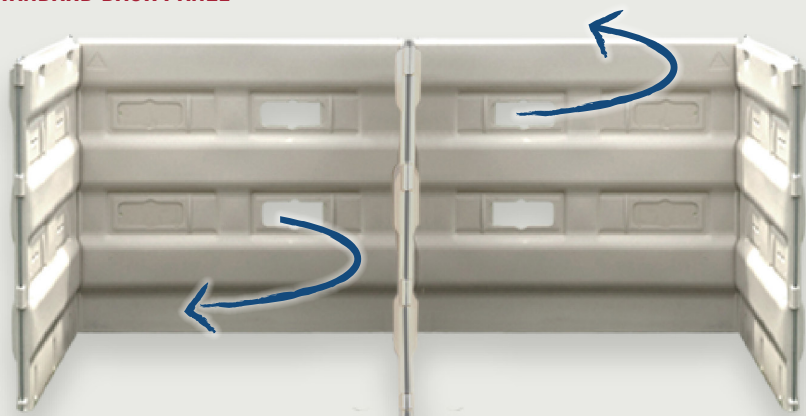

We offer flexible, modular solutions for your indoor spaces. Our indoor pens help meet the challenges of indoor raising with maximum ventilation, versatility and ease of cleaning. Many customizable features allow you to create a pen that meets your needs and fits your space.

WEIGHT	17 kg 37 lbs

The Calf-Tel Compact is the most efficient solution for smaller sized calves or shorter-term calf housing needs.

The Calf-Tel Compact is easy to clean, store and transport. When space is a concern, the Calf-Tel Compact's reduced footprint increases the number of hutches you can use in a given area. The standard, one-of-a-kind, fully adjustable rear door is ideal for ease of bedding and increased ventilation.

ECS

Easy to move, manage and maintain your units. Much easier to clean than wood hutches. Minimizes bedding, feed times and general labor. Fits inside of a standard 8' x 5' wood base and provides more room for the calf.

SPECIAL
ORDER
PRODUCT

CALF-TEL PLASTIC FLOOR

A plastic floor that can be added onto existing wood bases for a cleaner, healthier option. Disperses waste better than wood slat floors.

- **Lightweight and easy to move** for cleaning and maintenance
- **One piece** - no construction necessary
- **Cleanliness** - made from a structural, plastic foam making it easy to clean and keep clean so bioburdens aren't a burden
- **Comfort** - Calf-Tel Plastic Floor provides flexible cushioning under the calves weight for added comfort under hoof and while laying down

Grounded in stability and comfort, the Calf-Tel Plastic floor is a perfect base for your calf raising operation.

COVERED UNDER OUR
10 YEAR LIMITED WARRANTY.
